

Didn't start it? Don't approve it.

A login prompt you didn't ask for is a warning, not a favor.

1

Deny it

Tap Deny or Don't allow. Don't approve just to make it stop.

2

Report it

Tell IT right away. A surprise prompt means someone may have your passphrase.

3

Change your passphrase

From a device you trust, on the real site.

4

Never share a code

No real help desk, bank, or boss will ask for your MFA code.
